Document technique

## **STILES**

Technical document

# Explication du Document / Document Explanation

-----  
**!IMPORTANT!**

**Bien que les dessins soient à grandeur réelle, un sablage est effectué sur le dessus et le dos de chaque battant, centre et profil. L'épaisseur peut donc varier et ne sert ici que de référence standard.**

**Toute impression peut modifier l'échelle, veuillez vérifier que les dimensions sont encore à l'échelle pour plus de précision.**

-----

**!BEWARE!**

**Even if the drawings are on a real size scale, we sand the front and back of each stile, center and profile. The thickness might vary from the drawings and should be only used as a standard reference. Printing this document can change the scale, make sure that the size are still correct before using this document.**

-----

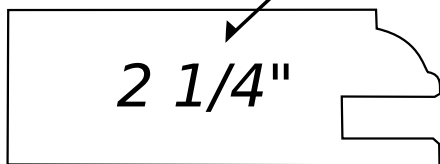

## Battant / Stile

Nom du battant et traverse

Stile and rail Name

Coché si peut être au 45°  
Checked if it can be mitered (45°)

Coché si peut être au 90°  
Checked if it can be cope and stick (90°)

Coché si peut être en modèle  
Checked if it can be used for model  
ARC/600/650/655

Coché si peut avoir une craque à peinture S  
Checked if it can have paint crack S

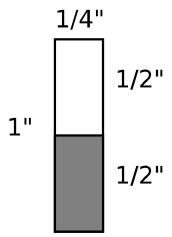

Échelle  
Scale

-----  
Pour les centres, la longueur visible est la section profilée que l'on peut voir du centre après qu'il soit inséré dans le battant.

For center panel, visible length is the part of the shaped center we can still see once it's inserted in the stiles.
